### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses a process for synchronizing an input signal. Prior art references show similar methods but fail to teach: **“demodulating the input signal (S) according to a second demodulation method in relation to a second signal parameter for creating a second demodulated input signal and correlating the second demodulated input signal with a second comparison signal that depends upon the second demodulation method for determining a time offset between the second demodulated input signal and the second comparison signal”, as in claim 1; “the input signal (S) is demodulated according to n different demodulating methods in relation to n different demodulated input signals; and each demodulated input signal is correlated with an associated comparison signal dependent on the associated demodulation method to determine a time offset between each demodulated input signal and the associated comparison signal”, as in claim 4; “wherein each result of the correlation is subject to a first interpolation between sampling points”, as in claim 9.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
